

9/29/16 Rates.f update (R. Felton)

Rates.f has had format changes made to it, to read reactions.rx files that had been formatted based off of the KIDA database(<http://kida.obs.u-bordeaux1.fr/>). Please look at the png file: new_reactions.rx_formatting.png, which is in the subroutine help folder.

Reactions.rx now needs a header that matches the header in the .png file and the new formatting rules are in rates.f
